

# Joining the Webex Meeting

---

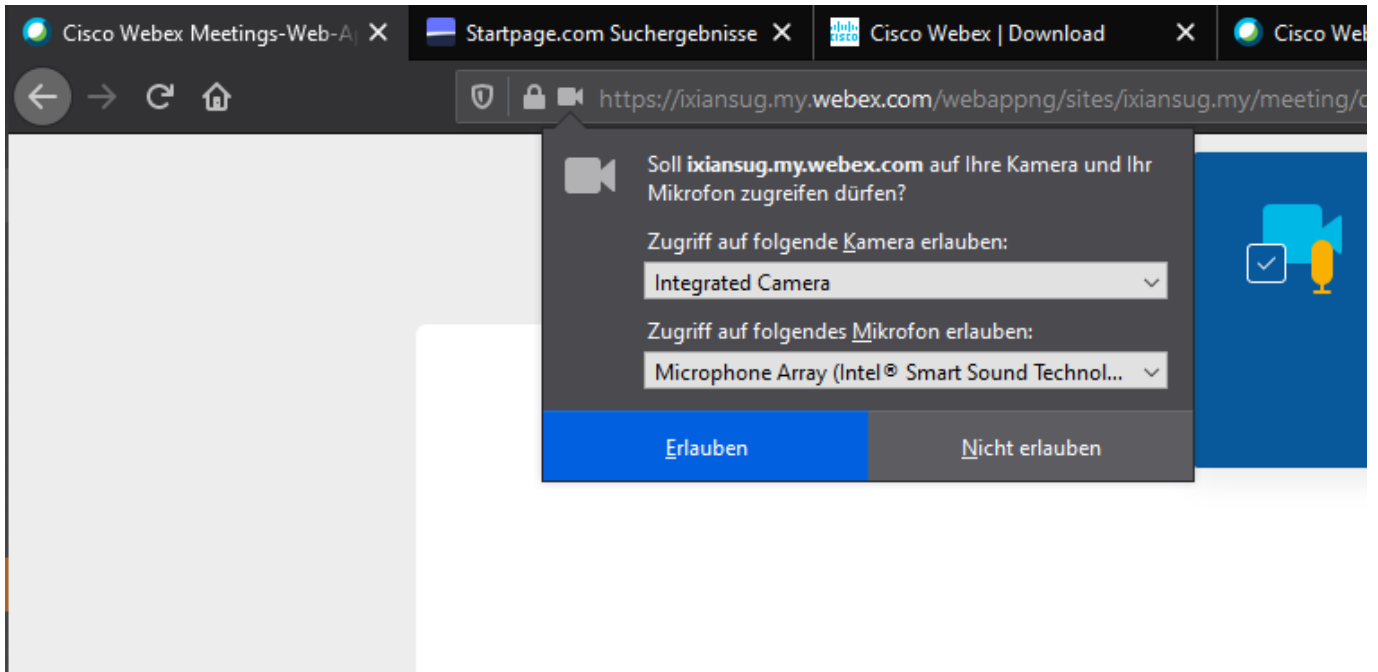

- Follow the Link: <https://ixiansug.my.webex.com/ixiansug.my/j.php?MTID=mfbe69020ee179064afacfb41dbf27a06>
- You should get prompted to download the desktop app. It is **highly recommended to use the Desktop App** as it offers more features (such as screen sharing in breakout room).
- If you won't get a prompt, visit <https://www.webex.com/downloads.html>
  - Desktop App is only available for Windows and macOS
  - Linux, BSD, ... users please use a WebApp.
- If you can't use the desktop app: just join through your Web-Browser! (Recommended: Chrome/Chromium)

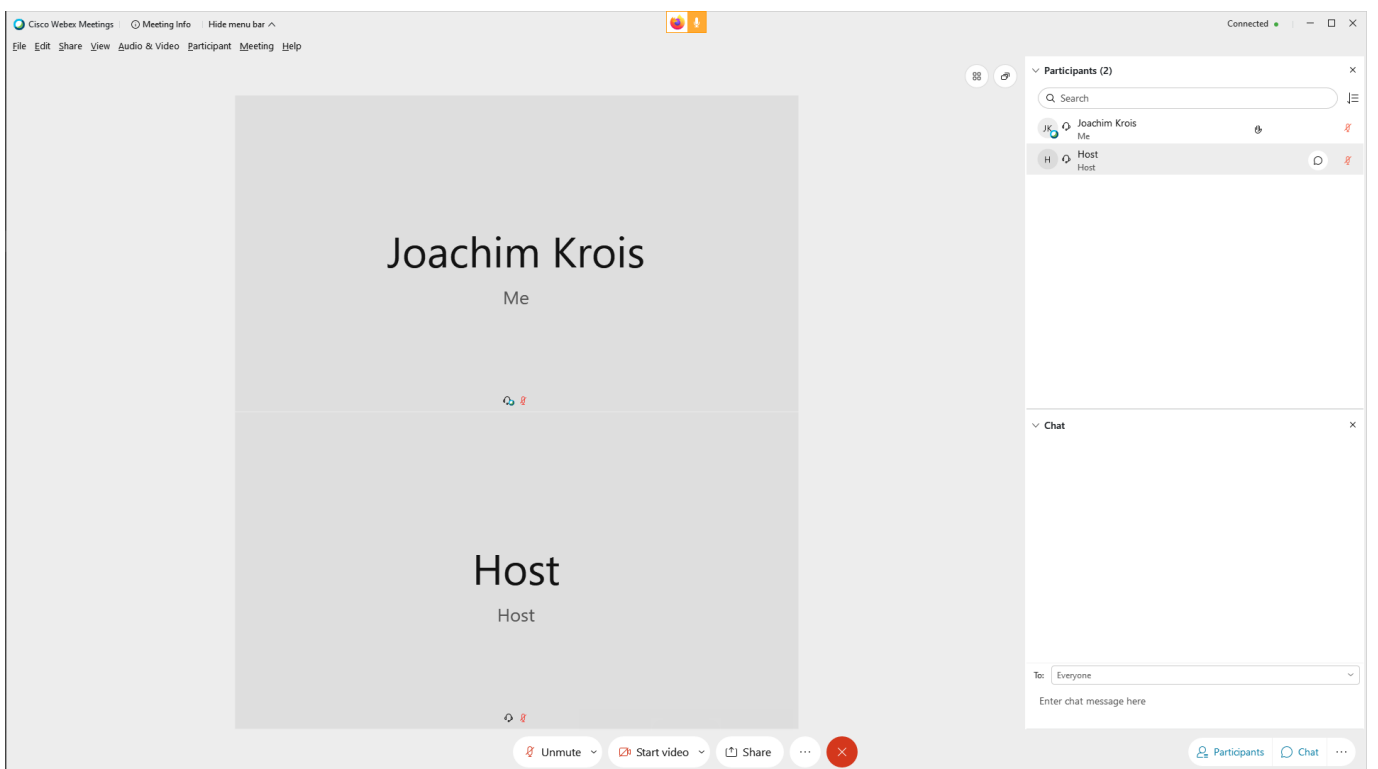

(German for "Join with your Browser")

- In case this doesn't show up, wait a few seconds, try different Browsers and Incognito-Mode

- When joining through the Web Browser grant access to your Microphone (and Camera)

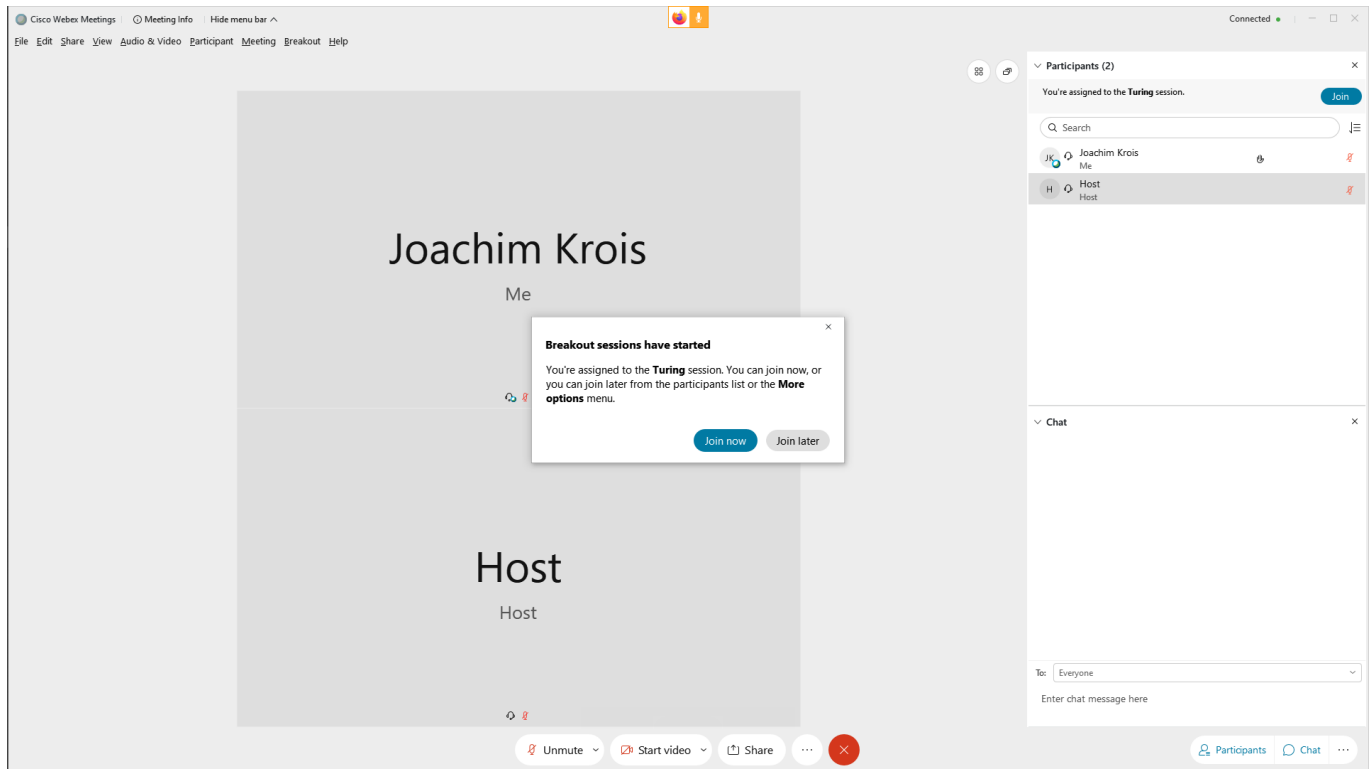

## Meeting Window

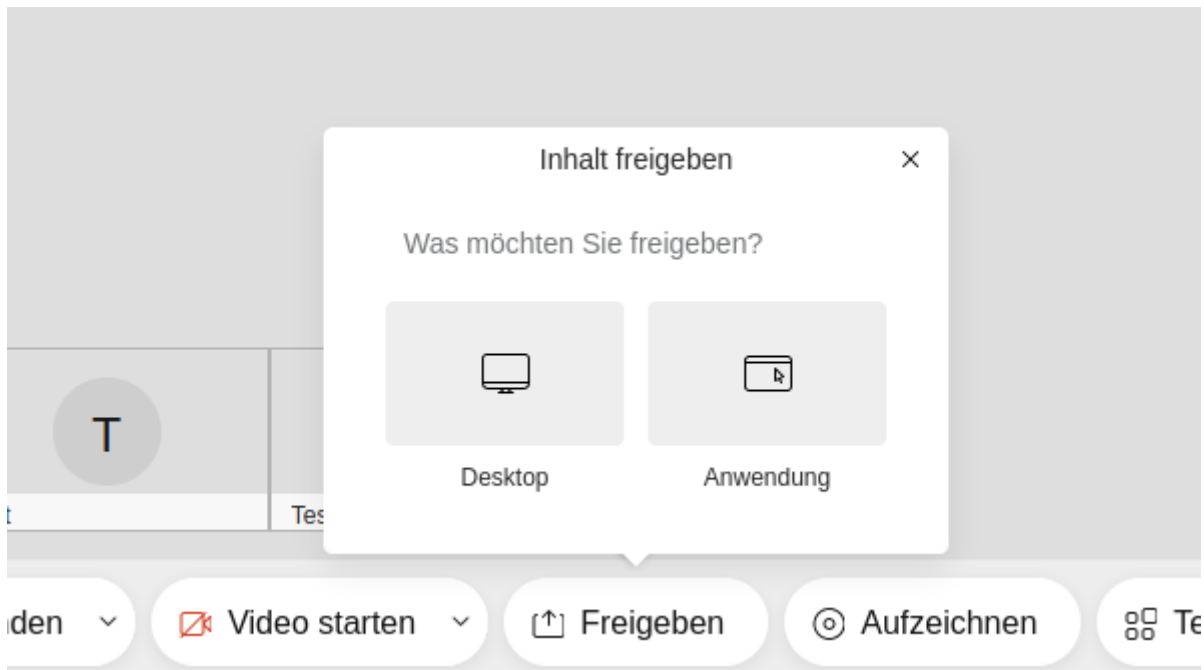

- During the lectures we will present a PowerPoint
- You can ask questions in the Chat in the bottom right

# Breakout Rooms

- During the exercises you will work together in small groups in breakout rooms
- When the exercise starts you will be prompted to move to a assigned breakout room

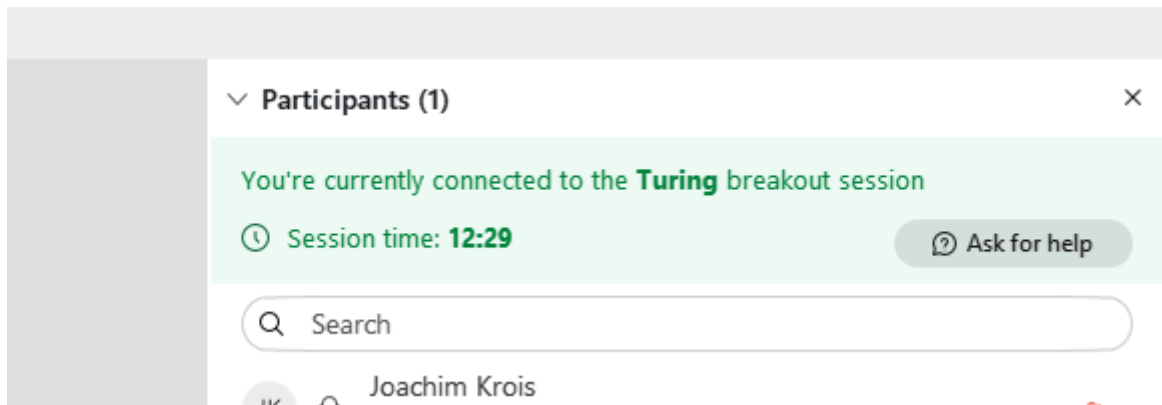

- Please assign one Person who will share their screen and solve the exercise together
- You can share your screen by clicking on **Share**

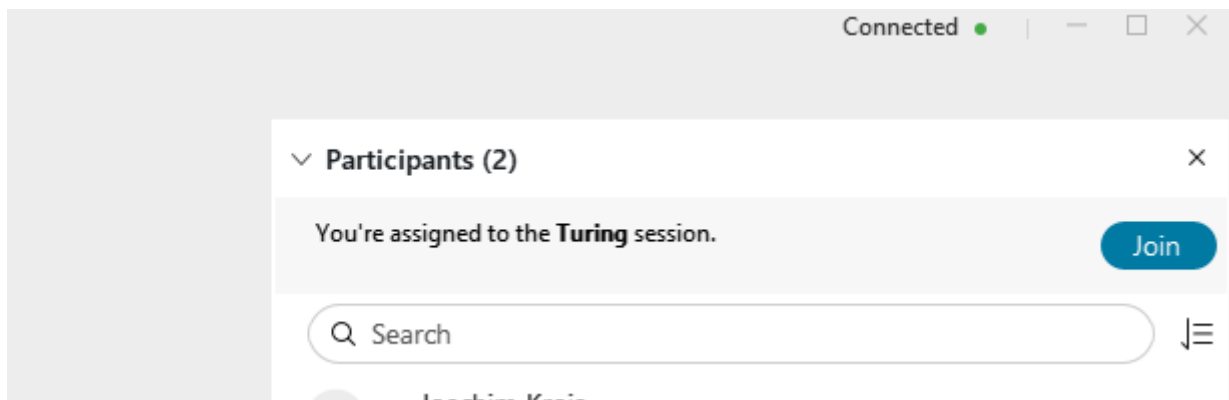

- Please share the Application the Jupyter Lab Exercises are running in

- If you're stuck, you can **ask for help** in the upper right corner. We will then join your group and help you out!

- 5 Minutes before the exercise ends you will get notified
- After the 5 Minutes you will return to the Main Session, where the next lecture will take place
- If you disconnect or accidentally leave the breakout room you can rejoin it by clicking on the "Join" button in the upper right corner

## Troubleshooting

---

- In case the link won't work for you these are the meeting credentials:
  - Meeting ID: 175 931 2922
  - Meeting Password: qMtFS2xxD76
- Windows: if your Audio and Camera aren't working. Please open your Windows Settings (Windows-Key + I) and head over to Privacy (dt: Datenschutz) > Microphone. And check if the **Allow apps to access your camera** field is checked. (Same for camera)
- You may need to restart the Cisco Meetings App afterwards
